

WELCOME TO THE CONSORZIO CHIMECO (CHIMECO GROUP)

In 2001, the Chimica Sarda Company and Eco. Ind. Sardegna gave birth to the Consorzio Chimeco (Chimeco Group) to consolidate a working group that has been operating in the industrial world for 35 years.

Chimica Sarda is mainly involved in the **trade, storage and distribution** (small and large quantities), of a wide range of chemical products.

Eco. Ind. Sardegna mainly performs services for the industry and in particular **chemical washing, treatment and reclamation activities (including waste management)**, employing highly qualified staff and state-of-the-art equipment.

The exchange of professionalism and the **creation of synergies** between the two Companies gave birth to the Consorzio Chimeco (Chimeco Group), which develops integrated, effective and tailored solutions to solve the specific problems of customers, who turn to a single partner to analyze, address and satisfy their needs from A to Z (**global service**).

OUR STRENGTHS

Security

All the working activities we carry out involve risks for the health of the workers and the safety of the working environment... SAFETY FIRST!

Our department of SPP performs a **timely assessment** of the work to be performed and carries out **constant monitoring** during all activities, with the aim of minimizing the risks to workers who are always trained in the classroom and the field, supported and protected in the performance of work.

Experience and Training

Over the years, the Gruppo Chimeco (Chimeco Group) has become a point of reference for the market thanks to the professional experience gained over time. The staff is highly specialized and has **many years of knowledge of the activities** it carries out daily. Training is a constant in the organization and this allows to pursue the goal of continuous improvement and the achievement of higher and higher standards.

Research and Innovation

The Gruppo Chimeco (Chimeco Group) has a team dedicated to the continuous **research, study and evaluation of new technologies** and operational solutions: the industrial world is in continuous evolution and it's necessary to be ready to offer services always in step with the times and the changes. Procedures, technical specifications and equipment are constantly evaluated and updated with a view to efficiency, safety and environmental sustainability.

GLOBAL SERVICE
AT THE SERVICE
OF INDUSTRY.

OUR SERVICES

CONSORZIO CHIMECO

Technical services

The technical department provides its customers with a service of study of the process problems of the plants and the relative adaptable solutions. In the research and development laboratory, we design and produce chemical formulations for various industrial sectors, as well as for the chemical washing and treatment activities carried out by the company Eco.Ind. Here is a shortlist of some of the specialties produced: formulations for chemical washing (alkaline, neutral, basic, detergents), formulations for the stabilization of pumpable slurries, formulations for the stabilization of pollutants in waste (Fluorides, Chromium VI, etc.), etc.

ECO. IND. SARDEGNA

Chemical washing

Chemical washing is carried out on complete plants or parts of it, applying the technical specifications provided by the internal technical department or by the customers. This activity allows recovering the efficiency of the plants through the removal of the scale that form during operation and helps to minimize the interventions of replacement and mechanical maintenance of the treated equipment. The cleaning activities performed are various: **water-side and process-side** descaling (organic and inorganic deposits), **boiler and furnace gas side**, water-side **steam generators** with magnetite formation, **ship cooling and heating circuits**, etc. In general, the chemical and physical removal of scale and contaminants from plants of various types and complexity is carried out.

Treatment

We perform chemical treatment of various kinds, including **pre-treatment of wastewater and waste** of various kinds (using specific formulas and equipment), surface treatments of lines and equipment pre- and post-commissioning (**degreasing, pickling and passivation**), oil flushing **devarnishing** treatment and more.

Reclamation and Decontamination

We perform **reclamation of lines and tanks** (underground and above ground), both in confined spaces and with **"no man entry"** technology and with the release of **gas free certification**. We operate in various environments and in our history we have carried out these

activities in civil areas, in industrial plants in operation and in industrial plants in decommissioning. In particular, our reclamations have involved a wide range of products and pollutants including: fluid fuel oil, sludge, gasoline, diesel, ammonia, acids, alkalis, etc.

Product recovery and emergency management

A service of immediate management and recovery of the spillage of products is carried out. The organization, always ready and equipped, can act quickly and efficiently, guaranteeing the **minimization of the impact on the environment** and risks to health, as well as **reducing the extent of the activities of possible reclamation**.

CHIMICA SARDA

Marketing and distribution of chemical products

Chimica Sarda (Sardinian Chemistry) is the company of the group specialized in the commercialization, storage and distribution of a wide range of chemical products for various fields of application, mainly for the industrial sector (oil, chemical, agricultural, mining, etc.), and for the civil sector of water treatment. The dense network of **business relationships with major world producers** (due to the long experience gained in the sector) allows a **fast and reliable supply**, a large storage capacity and a large fleet of vehicles of different types complete the circle ensuring a **widespread distribution throughout the country**, quickly and safely.

In addition, our team of **ADR and RID-IMDG experts** in the company provides consultancy for the treatment of dangerous products and industrial waste, in accordance with the current international environment and work safety regulations.

Wastewater and industrial waste management and transport

Chimica Sarda (Sardinian Chemistry) is enrolled in the environmental management register and is authorized to transport special waste, both dangerous and not. The service includes **advice and complete management of the waste process**, from sampling to transfer to authorized disposal platforms throughout the country.
